

College of William and Mary Applied Research Center Student Newsletter

New Students Arrive!

Olga Trofimova introduces new summer students (left to right): Andrew, Jamie, Mathew, Andrew S. (visitor), and Stephanie to the Hirox Microscope.

Andrew, a William and Mary senior doing research over the summer on Niobium, uses the AFM with Rahul Bhure, a student from NSU.

NSU grad students Olu and Whitney study semiconductors for solar-cell applications on the AFM.

Lab Visitors

Chris Martens and Dave Marsell, from Pressure Systems, Inc., took a tour of the lab and had a sample analyzed using the Hirox Microscope.

Amy Wilkerson shows Joel Jenkins and Robert Fox, of Northrop Grumman, around Lab 2, which contains the new Hirox Microscope and the Scanning Electron Microscope (featured in the background).
